

Limited Development Option

Reduce density by subdividing large tracts of land on which development is restricted by conservation easements.

The Dutchess Land Conservancy created a limited development plan for a 340-acre farm in the Town of Amenia, allowing only one home site on each of three subdivided parcels, and protecting the remainder of the subdivided acreage with easements. The farm owners were able to capitalize on the residential value of home sites on scenic but marginal farmland and continue to cultivate a significant portion of subdivided cropland through lease-back arrangements with their new neighbors.

- Shared access via existing farm road
- Leased farmland under easement
- Homes located off farmland

Flexible Farm Incentives

1. Use conservation design guidelines to locate residential development, reserving the best farmland. (See "Fitting into the Landscape," A-1.)
2. Determine density option that best meets farm owner's goals, securing easement appropriate for concentrated density.
3. Locate home sites within identified development pocket; waive road frontage requirements and road standards to allow access via shared driveways or reduced-width local roads.
4. Review and approve conservation plan, waiving time limits and fees for incremental subdivision.
5. Incorporate approved plan as an addition to a municipal **Farm Conservation Map**.
6. Assure fast-track approval for future subdivisions based on pre-approved plan, maintaining agricultural assessment until subdivision occurs.

Help is available from planning staff and land conservancies for farm owners who wish to prepare farm conservation plans and for municipalities that encourage farm planning.

Who Benefits?

Farm conservation planning offers **the farm owner**...

- capital for reinvestment or expansion
- a broader range of density options
- more flexibility in locating home sites
- control over the pace of subdivision
- incremental extension of shared access roads
- reduced costs when planned lots are actually subdivided

Farm conservation planning helps **the community**...

- prevent repeated, uncoordinated subdivision
- move home sites away from scenic roads
- keep farmland on its tax rolls
- protect important farm soils
- support the agricultural economy
- retain the defining character of our countryside
